

Ana Luiza Souto da Costa

Belém, PA

Email: anaaluusoto@gmail.com

Professional Summary

Computer Science student at CESUPA with a focus on Data Science and Agile Management. Experienced in leading high-impact technology projects in the Amazon, specializing in applying FAIR data principles to biodiversity and developing assistive technologies. Recognized for excellence in R&D+I by Vale and a winner of multiple innovation challenges.

Formação Acadêmica

Bachelor in Computer Science– CESUPA

Belém, PA | Conclusion date: December/2026

Key Experiences

1. Data Science Researcher | Museu Paraense Emílio Goeldi (MPEG) Oct 2025 – Present

- Core Contribution: Implementing FAIR Data Principles (Findable, Accessible, Interoperable, Reusable) to standardize Amazonian botanical data.
- Technical Impact: Utilizing Python (Pandas) to process large environmental datasets, bridging the gap between raw scientific data and bioeconomic scalability.

2. Founder & Project Lead | Ymã (Sustainable Energy) 2024 – Present

- Core Contribution: Developed and implemented biodigesters in the Ilha do Combu community to replace fossil fuels with clean biogas.
- Recognition: Awarded 1st Place at Amazon Hacking 2024 and the Vale Excellence Award in R&D+I. Presented the solution at COP30.

3. Founder & Product Lead | TaSabido (Assistive Tech) 2025 – Present

- Core Contribution: Leading the end-to-end development of software focused on motor coordination for neurodivergent individuals.
- Technical Impact: Prioritizing inclusive UX/UI design and pedagogical requirements to solve real-world accessibility gaps.

4. Junior Requirements Analyst | FISETECH Oct 2025 – Feb 2026

- Core Contribution: Managed business logic for critical fiscal compliance systems.
- Technical Impact: Automated management metrics by coding Burndown/Burnup charts, reducing operational overhead and increasing team predictability.

5. Sustainability Coordinator | Project Hefesto (NIEJ) Apr 2023 – Dec 2024

- Core Contribution: Monitored sustainability indicators and environmental impact metrics for local projects.
- Impact: Aligned project goals with UN Sustainable Development Goals (SDGs), ensuring social and environmental compliance.

Technical & Adaptive Skills

- Languages: Python (Pandas), SQL, BPMN.
- Data & Science: FAIR Principles, Open Science, Bioeconomy, QGIS.
- Frameworks: Scrum, Kanban, OKR, Design Thinking, ESG/SDG.
- Soft Skills: Public Speaking (COP30 Speaker), Strategic Leadership, Cross-functional Team Coordination.

Honors & Awards

- Vale Excellence in R&D+I (2025): For Project Ymã.
- 1st Place Amazon Hacking (2024): Bioeconomy track.
- 2nd Place Amazon Hacking (2025): Climate, City & Bioeconomy track.
